### **DETAILED ACTION**

1. Claims 1-20 are presented for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16, drawn to authenticating access, classified in class 709, subclass 225.
  - II. Claims 17-20, drawn to multiplexing data packet, encrypting and decrypting data packet, classified in class 709, subclass 246.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as multiplexing data packets into packet data stream for delivery, modifying packet data stream by encrypting packets, DNS server for providing destination address for data streams. See MPEP § 806.05(d).

4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Art Unit: 2152
